GK_Sediment_15Aug2015_V2.pdf

Hi Dan,

I keep getting these stupid black dots but I wanted to run this by you, I combined both Surface Water and Sediment locations onto one figure and changed the extent based on the extent of the data around Durango. I also removed the location labels so as to not clutter the figure. Take a look. I am available 24 hours a day to make numerous changes ☺

Hi Dan,

What if we go with something simple like this. Couple of questions:

Title? I can change the text of simply remove it to give more room for the map itself.

Logos: do you have specific logo to use for this response
